## Biologischer Wein – nachhaltiger Weingenuss!

*Organic wine - sustainable wine enjoyment!*

Schonender Umgang mit der Umwelt und den Ressourcen stehen im Vordergrund. Der Einsatz von chemischen und synthetischen Pflanzenschutzmitteln oder Gentechnik sind im biologischen Weinbau absolut tabu. Um die Rebstöcke vor Krankheiten und Schädlingen zu schützen, dürfen nur natürliche Präparate verwendet werden. Das Gleiche gilt für die Düngung. Vermehrt kommen auch krankheitsresistente Rebsorten zum Einsatz. Davon profitieren die Bodenqualität und die Biodiversität im Rebberg. Eine wichtige Voraussetzung für die Entstehung hochwertiger, aromatischer Weine. Achten Sie auf das Bio-Label in der Weinkarte.

*Careful handling of the environment and resources are in the foreground. The use of chemical and synthetic pesticides or genetic engineering are absolutely taboo in organic viticulture. To protect the vines from diseases and pests, only natural preparations may be used. The same applies to fertilization. Disease-resistant grape varieties are also increasingly used. This benefits soil quality and biodiversity in the vineyard. An important prerequisite for the creation of high-quality, aromatic wines. Look for the organic label on the wine list.*
